

LED CURVED ROOF RAFTER

Bright white LED lighting brightens up your space while keeping your awning taught and stopping water pooling.

Made to our exclusive design curve and shape, the Aussie Traveller Curved Roof Rafter (CRR) helps to prevent wind flap and sagging in the fabric of the awning and assists water run-off in the rain. The curved design of the Curved Roof Rafter protects against damage and marking to the awning fabric.

Featuring bright white 950mm LED lights that are battery operated, the LED Curved Roof Rafter includes a USB battery charger (18650 batteries not included), and all the necessary brackets for installation. There is no wiring or cables required, making it easy to use and install.

The Mini Curved Roof Rafters are our standard sizing, suitable for awnings of all widths and differing projections on RVs, Caravans and Pop-tops. With their 95mm radius arch height, the lower radius design also reduces the chance of marking or stretching the vinyl fabric.

The Mini CRR can be used on cassette awnings that project out 2.5m when used in conjunction with an AFK/CRR spigot bracket.

FEATURES

- Bright white LED lights
- No cables - battery powered
- Includes charger
- Easy to use & install
- Protects awning fabric
- Available in white & black
- Fitting brackets included
- Suitable for most rollout awnings

Battery operated — no tricky wiring.

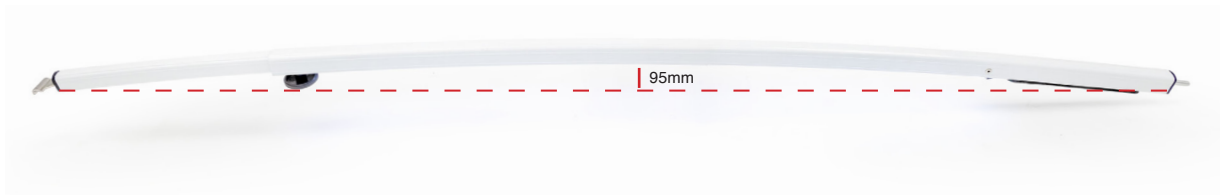

Simple push-button operation.

15'	2
16'	2
17'	2-3
18'	3*
19'	3*
20'	3*
21'	3-4*
22' and over	4*

Curved design prevents water-pooling while brightening up your space.

PLEASE NOTE:

- On LED Curved Roof Rafters, the ends are switched to allow for the user to easily reach the on/off button.
- We recommend substituting one of the LED CRRs with a Curved Tension Rafter for longer awning lengths above 18'.
- Please contact our Aussie Traveller team for the full range of outrigger mounting brackets and spare parts to suit cassette and rollout awnings.
