

Down Under Series II App Instructions

The following instructions will assist you with downloading and using the EvaKool Down Under Series II App. This app is suitable for Down Under Series II 95L, 80L & 65L only. Please note that the app is a bonus feature and is not required for the fridge to function.

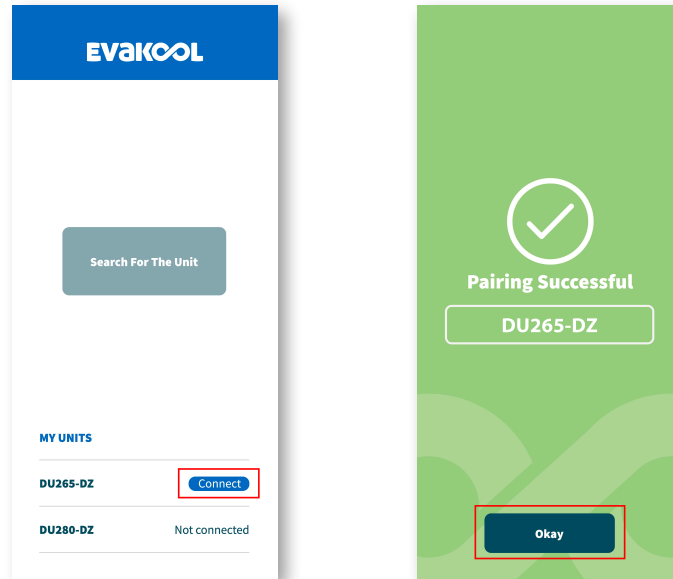

Step 1: Download the App from the Apple App Store or the Google Play Store. Once downloaded, enter the app by clicking its icon on the home screen.

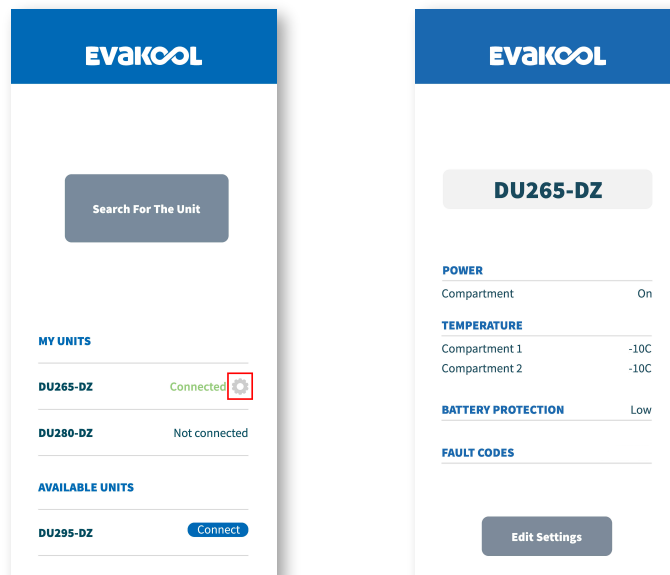

Step 2: To connect to the fridge press the 'Search for the unit' button. While the app is searching, you will stay on the 'Searching' page.

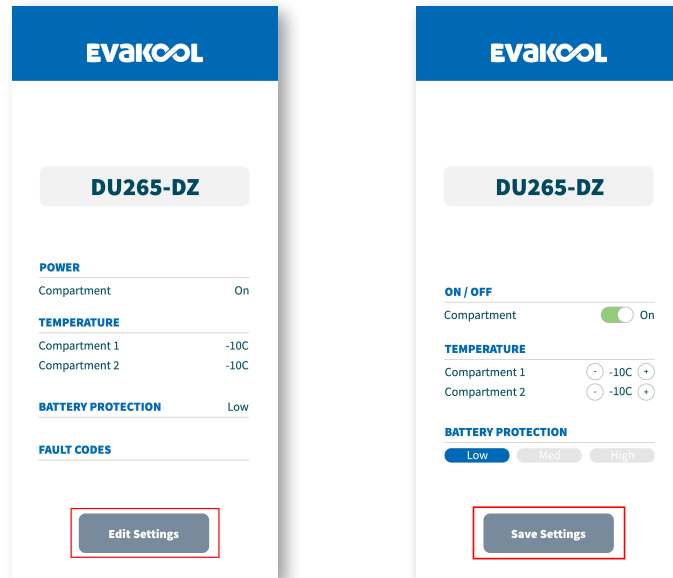

Step 3: Once the app has found the fridge, click 'Connect' to connect to the fridge. Once you have successfully connected, you will hear an audible beep from the fridge, the bluetooth light will turn on, and the app will say 'Pairing Successful'. When you are ready to proceed, click 'Okay'.

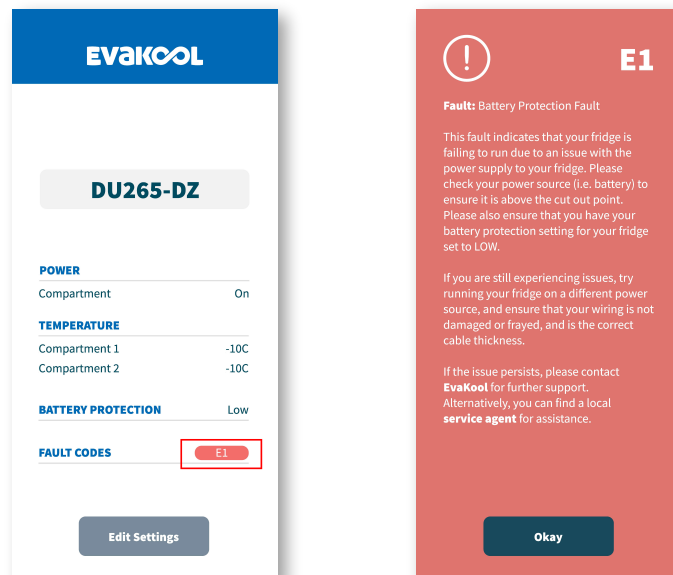

Step 4: Under 'My Units', press the ⚙️ to enter the fridge settings of the selected fridge. You will now see the setting page which will display all the current fridge settings

Step 5: To edit the fridge settings press 'Edit Settings'. There are three fridge settings that you can change; On/Off, Temperature & Battery Protection Mode. Once you have chosen the desired settings press 'Save settings'.

Step 6: If you experience a fault code, simply press the red button next to 'Fault Codes'. You'll be taken to a page that will indicate what the fault is and how to proceed. For example, here is an E1.

Step 7: If you are using more than one Down Under Series II fridge and you are currently in the settings for Fridge 1 but want to change the settings of Fridge 2, simply exit and restart the app. This will take you back to the home screen, where you can select which fridge you want to connect to.

Two users cannot connect at the same time. Please disconnect app if wanting to use app on a different device.
