

LAZY TENT

Inflatable Tent Installation Guide

For LT63KNA / LT75KNB / LT75KNC

STEP 1 LAY OUT & SECURE	Lay the tent flat on a suitable level surface. Position it correctly and secure the four corners using the supplied ground pegs.
STEP 2 INFLATE	Make sure the inflation valve is correctly closed. Connect the supplied air pump and inflate the air columns until the tent is fully erected.
STEP 3 FINAL SECURING	Install the remaining ground pegs and securely tension the guy ropes. Check that the tent is stable before use.

Approximate main cabin setup time: around 5 minutes (setup time may vary by user).

STEP 1

STEP 2

STEP 3

LT75KNC awning: After erecting the main cabin, attach the detachable awning and secure it using the supplied awning support poles, guy ropes and ground pegs.

Important: Select firm, level ground and keep the tent clear of sharp objects. Always secure the tent with the supplied ground pegs and guy ropes. Ensure the tent is dry and fully deflated before packing.
