SENTRY 'PRO' AMBER STROBE

P/No. 85322A

Powerful Magnet ensures secure mounting

Rechargeable powerful 2200mA Lithium battery

Features:

- 12 High Intensity L.E.D's
- Powerful Class 1 SAE output
- 5 hour battery run time
- Heavy duty magnet rated to 120 km/h
- Built to last with virtually unbreakable polycarbonate lens
- No moving parts, reinforced by solid state circuitry and fully sealed (IP65) for ultimate reliability
- Simply charged via 12V cigarette lighter plug

Traditionally, users who require a warning light occasionally use magnetic units. These can be impractical due to their cable which runs from a socket inside the vehicle, out the window and to the unit.

The new Narva Sentry 'Pro' Amber Beacon removes the need for those plugs and cables, creating an efficient and user-friendly device whilst revitalising the magnetic strobe and beacon market.

Combining the power and performance of L.E.D technology with a lithium battery, the cordless Sentry 'Pro' provides a versatile and portable warning light to suit a wide variety of industries including commercial construction, manufacturing and mining. The Narva Sentry 'Pro' is also suited in most work high-flow transport environments like warehouses, docks and railyards.

Ultimately, there are endless applications to suit an amber beacon across a wide variety of vehicle types. Backed by a SAE Class 1 strobe, 12 high intensity L.E.D's and a virtually unbreakable polycarbonate lens, the Narva Sentry 'Pro' is the perfect vehicle mounted warning light solution.

The powerful lithium battery provides 5 hours of life before charging is required and the strong magnet ensures secure mounting at speeds up to 120km/h.

12V Cigarette lighter plug

240V Charger to suit Sentry 'Pro' P/No. 85323

PART No.	85322A	
DESCRIPTION	Sentry 'Pro' Rechargeable Strobe with Magnetic Base
