

SOG® + SOG®II 12V ventilation systems

Optimizes camping toilets in two major ways:

- Nuse without any sanitary additives. The increased flow of oxygen guarantees optimal decomposition (similar to that of an aeration tank at a treatment plant).
- Enormous increase in comfort due to removal of unpleasant odours by suction. No more smells in the caravan's limited living spaces.

Technology instead of chemicals!

As soon as the high performance ventilator turns on and the Blade Valve starts to open, our ventilation system will create a slight negative pressure in the cassette. This creates a „SOG®“ (suction) at the toilet's opening and fresh air will be sucked in, which acts like a seal preventing any unpleasant gases (=odors) from escaping the tank.

The SOG® odor system is compatible with each Dometic or Thetford toilet!

SOG®- kit

SOG®II - kit

SOG®II - the floor version:

The SOG®II offers the advantage of a filter cartridge, which can be easily positioned at different locations within the caravan (e. g. in the garage, under the seat, in the double bottom or in the storage compartment). **Hose or pipe- up to a length of 3 m possible!**

The specially developed filter casing and the filter material neutralise the extracted, odorous air completely! The system is therefore particularly suitable for caravans.

Ventilation takes place through the floor. Installation examples: www.sog-systeme.de

SOG® + SOG®II Type A

2. connection for additional tank

Thetford C2/C3/C4

SOG® + SOG®II Type F

2. connection for additional tank

Thetford C250/C260

SOG® Compact for macerator toilets

Even in the limited amount of space of the luxury class You do not have to do without comfort... SOG®COMPACT both electrical and other system components into a technical unit and thus offers the advantage of very simple installation with fixed tank toilets.

FOR PREMIUMCLASS

for Jabsco and Dometic

SOG® + SOG®II Type B

2. connection for additional tank

Thetford C200

SOG® + SOG®II Type G

2. connection for additional tank

Thetford C500

SOG® + SOG®II Type 3000A

2. connection for additional tank

Dometic CT3000/CT4000

SOG® + SOG®II Type D

2. connection for additional tank

Thetford C400

SOG® + SOG®II Type H

2. connection for additional tank

Thetford C220

SOG® + SOG®II Type 320S

2. connection for additional tank
