

RV REVERSE CAMERA

Wireless Camera Kit

The Sphere Wireless Reversing camera range is designed to make your RV reversing experience safer and more convenient than ever before. The clever design eliminates the need for complex wiring, making installation a breeze.

Featuring a 7-inch digital wireless monitor, this camera system provides a crystal-clear view of your surroundings in real-time, giving you the confidence to navigate any tight spot or challenging driving situation.

The Sphere wireless reversing camera system supports up to four cameras and offers multiple viewing options, including single, split-screen, and quad viewing options. This flexibility allows you to customize your view and select the best option for your specific driving needs.
